SCHOOL REOPENING CRITERIA
(09/19/2020 - 09/25/2020)

CURRENT STATUS
Data is updated every Saturday

Weekly status breakdown *per 100,000 people

- New Cases*: 72.2
- % Persons Tested Positive: 6.5%
- Avg. Daily Hospitalizations*: 6.1

Planning scenarios

- **Green**
  - Minimal Community Spread
  - Schools are open for in-person instruction

- **Yellow**
  - Minimal-to-Moderate Community Spread
  - Schools may use a hybrid model of remote learning and in-person learning options with precautions in place.

- **Red**
  - Significant Community Spread
  - School buildings are closed – remote learning only.

Updated 9/26/2020
LOOKING FORWARD

• BROADER SCHOOL & BUSINESS REOPENINGS
  *We have to be vigilant to get more kids in school and workers back on the job*

• VACCINE PLANNING
  *Led by DPH – planning for months*

• COLDER WEATHER
  *Presents challenges with people spending more time indoors*
COVID-19 RELIEF & SUPPORT

Grants for Small Businesses

Up to $100,000

for eligible expenses due to COVID-19

ROUND 2
APPLICATIONS AVAILABLE:
OCTOBER 1, 2020
<table>
<thead>
<tr>

Home Test Kit

Overview of Program
The State of Delaware is expanding options for COVID-19 detection through the addition of an at-home testing option prioritized by Division of Public Health based on the most recent data being reported from healthcare providers.

Who can use at-home testing option
This method of testing is available to Delaware residents only. If you are ordering for a family, you will need to complete one form per person.

Division of Public Health encourages any Delawareans over the age of 60 and those in high-risk groups to utilize this option. Additionally, Division of Public Health recommends this testing method for the following communities and residents:

New Castle County
- Newark
- Any student of the University of Delaware
- Wilmington (especially those in zip codes 19801, 19802, and 19805)
- New Castle (those in zip code 19720)

Kent County
- Dover
- Any student of Delaware State University

Sussex County
- Individuals who attended the recent rodeo in Bridgewater

Individuals who went to the beach or a gathering without social distancing and/or not wearing a face covering while using community test sites. Additional information can be found here.

What type of test is this?
The at-home testing option utilizes saliva collection, which has the same effectiveness as the oral swab test performed under the supervision of a Vault healthcare provider through a video telehealth visit, eliminating the need for in-person visits.

You will need video telehealth access. Plan ahead if you require assistance with accessing telehealth or alt. Please note: This is not an antibody test. This test is designed to determine if you currently are infected with the virus.

How It Works
1. Register below with the State of Delaware.

   - You will need a smartphone or video-enabled computer to take the test.

   - All notifications regarding testing will be sent electronically. No phone calls will be given.

2. Once you submit a request, you will receive a response within two business days.

   - If approved, you will receive a link to Vault Health with your test code number. ONLY those with a home test kit.

   - If your request does not meet the criteria for approval, you will be notified via email. Please check your area.

3. You will receive your testing kit the next day. The box will be delivered to your address via overnight delivery instruction card. Read it carefully. DO NOT OPEN THE TEST KIT PACKAGE until you are instructed to by a Vault healthcare provider.

4. Make sure to download the Vault app on your smartphone or electronic devices. Your saliva-collection will be supervised by a medical practitioner over the video call.

5. Ship the test kit back. A shipping label is provided at no-cost to the resident. As Friday and weekend shipping does delay the test results, all packages should be returned to a UPS store by Thursday afternoon for quickest turnaround.

6. You will get a report of your results (positive, negative, or inconclusive) via email 48-72 hours after your sample arrives at the lab.

- **Source under investigation**
- **Visitation activities and PPE availability do not appear to be factors in the spread of illness**
Action Steps: Long-term Care

• DPH and Division of Health Care Quality (DHCQ) infection control surveys
• DPH providing recommendations - testing guidance, isolation and quarantine, patient and staff management strategies
• DPH epidemiologists assigned to investigate
• Active daily screening in place
• Repeat training available for staff
• Updated guidance to test all staff weekly
• Regular calls with LTC facilities
FIGHT the FLU!
GET YOUR VACCINE TODAY
flu.delaware.gov
Flu Season

• Vaccination: more important than ever
• Vaccine won’t prevent COVID, but will lower risk for illness and complications
• Vaccines for ages 6 months+
• Focus on high-risk populations

flu.delaware.gov
4 Locations to get your Flu Vaccine

1. Medical provider – Doctor’s office or Federally Qualified Health Center: Westside, Henrietta Johnson, La Red Health Center

2. Pharmacies

3. Community Flu Clinics

4. DPH Clinics – appointments only
   - 8 clinics this week - statewide

flu.delaware.gov
Flu or COVID-19?

**Similarities**
- Fever or feeling feverish/chills
- Cough
- Shortness of breath or difficulty breathing
- Fatigue (tiredness)
- Sore throat
- Runny or stuffy nose
- Muscle pain or body aches
- Headache

**Differences**
- COVID-19 symptoms - change in or loss of taste or smell.
- COVID-19 may have no symptoms
- Flu symptoms generally come on more suddenly
